## DETAILED ACTION

### *Allowable Subject Matter*

1. Claims 42-48, 50-76, 122-130, and 132-159 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

There was no prior art found by the examiner that suggested modification or combination with the cited art so as to satisfy the combination of all the limitations in claims 42 and 122.

As to claim 42, the prior art of record, taken alone or in combination, fails to disclose or render limitations "an uncaging light source that directs uncaging light at the work area or a selected portion thereof, wherein the uncaging light has an optical power density greater than 100 uW/cm<sup>2</sup> at one or more wavelengths between about 100 nm and about 400 nm"; "a multiwell plate" and "a plate holder configured to accept the multiwell plate in a first fixed position, wherein the multiwell plate in the first fixed position occupies the work area, wherein the multiwell plate comprises a photoactivatable caged component, and wherein exposure to the uncaging light results in uncaging of the caged component", in combination with the rest of the limitations of claim 42.

As to claim 122, the prior art of record, taken alone or in combination, fails to disclose or render limitations "introducing at least one photoactivatable caged component of the assay into the reaction area, wherein the reaction area has an area of at least about 50 mm<sup>2</sup>" and "exposing the reaction area to uncaging light, the optical

power density of the uncaging light being substantially uniform over the entire reaction area, whereby exposure to the uncaging light results in uncaging of the caged component".
